PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience specializing in scalable UI development using React.js, Redux, Tailwind, and Ant Design. Strong expertise in two major domains. Warehouse Management Systems (WMS) and FinTech. Skilled in state management, performance optimization, and building reusable component architectures. Experienced in leading teams, collaborating with backend (.NET & NESTJS) engineers, and delivering secure, high-performance applications. Passionate about clean code, DSA, and solving complex UI engineering challenges.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | **eArbor**, Hyderabad **(Jan 2022 - July 2025)**

- Led a team of 5 developers, including 2 frontend and 2 backend engineers + 1 QA, ensuring smooth collaboration and timely project delivery.
- Designed and implemented highly interactive, scalable, and responsive UIs using React.js, Redux, and Ant Design.
- Collaborated closely with backend teams to integrate .NET APIs and optimize performance across applications.
- Enhanced state management for seamless user interactions and efficient data handling.
- Improved page load speed by 30% using performance optimization techniques.
- Conducted code reviews, mentoring junior developers, and ensuring high coding standards.
- Worked on complex feature development, debugging, and UI/UX improvements to enhance the overall user experience.

Solution Engineer | **M2P Solutions Private Limited**, Hyderabad **(July 2025 - Present)**

- Working on building secure, scalable, and high-performing FinTech user interfaces, focusing on reliability and smooth customer experience.
- Implementing core UI flows using React.js, Redux Toolkit, Tailwind, and TypeScript to ensure consistency and maintainability.
- Collaborating with backend teams to integrate payment APIs, authentication flows, and financial dashboards.
- Optimizing UI responsiveness and accessibility to meet FinTech-grade performance and security standards.
- Engaged in improving component reusability, code architecture, and frontend engineering best practices within the team.
- Contributing to sprint planning, troubleshooting production issues, and delivering high-quality features under tight timelines.

EDUCATION

B.Tech - Civil Engineering **(2016 - 2020)**

Annamacharya Institute of Technology and Sciences

PROJECTS

MAI - WMS (Warehouse Management System) (Jul 2022 - July 2025)

Technologies: React.js, Redux, .NET, PostgreSQL

- Built a feature-rich WMS that streamlines logistics and improves warehouse efficiency.
- Implemented real-time stock tracking, batch and lot tracking, automated inventory updates, and predictive analytics for optimized stock replenishment.
- Developed a scalable, responsive UI with Ant Design and Tailwind CSS.

BOLX - WMS (Dec 2022 - July 2025)

Technologies: React.js, Redux, .NET, PostgreSQL

- Created an automation-driven WMS enhancing workflow efficiency, inventory management, and order fulfillment.
- Integrated real-time analytics and ERP system syncing for seamless business operations.
- Designed a modern, user-friendly interface optimizing warehouse task execution.

SBBS - Printer Rental Services (Jan 2024 - July 2025)

Technologies: React.js, Redux, .NET, PostgreSQL

- Developed a customizable rental platform enabling flexible printer rental services.
- Implemented secure payment integrations, real-time data reporting, and automated maintenance scheduling.
- Enhanced customer experience with a self-service portal and interactive UI.

HDFC – Prepaid Customer Portal (July 2025 – Dec 2025)

Technologies: React.js, Redux, Tailwind CSS, Ant Design, REST APIs

- Developed a secure and responsive customer portal for HDFC prepaid card users.
- Implemented login flows, dashboard UI, and card management features with reusable components.
- Integrated transaction APIs and optimized dynamic financial data rendering.
- Improved cross-browser compatibility, form validations, and error-handling flows.
- Collaborated with backend and QA teams to deliver high-quality, stable releases.

CIM Finance – Cashier Portal (July 2025 – Dec 2025)

Technologies: React.js, Redux, Tailwind CSS, Ant Design, REST APIs

- Built cashier transaction workflows with real-time validations and transaction accuracy.
- Developed modular and reusable UI components for payment collection and receipt generation.
- Implemented dynamic form logic with conditional rendering and validation layers.
- Improved frontend performance through optimized state management using Redux.
- Ensured compliance with financial UX standards and operational requirements.

Carmudi – Finance Management Portal (July 2025 – Dec 2025)

Technologies: React.js, Redux Toolkit, Tailwind CSS, Ant Design, REST APIs

- Building scalable UI architecture for customer onboarding and loan processing workflows.
- Developed dashboards, workflow screens, and data-driven components with real-time updates.
- Integrated financial APIs and optimized rendering for high-performance user experience.
- Enhanced UI consistency using Tailwind + Ant Design component patterns.
- Collaborating with product and backend teams to deliver reliable financial features.

CORE RESPONSIBILITIES & ACHIEVEMENTS

- **Team Leadership:** Led a 5-member team, ensuring project goals, quality standards, and technical guidance.
- **Frontend Development:** Built scalable, reusable React components following best practices.
- **State Management:** Leveraged Redux for efficient data handling and application performance.
- **UI/UX Optimization:** Designed high-performance, mobile-friendly, and intuitive user interfaces.

- **Backend Collaboration:** Worked closely with .NET teams to ensure smooth API integration.
 - **Performance Tuning:** Optimized page load times, reduced re-renders, and improved data-fetching strategies.
 - **Mentorship & Code Reviews:** Guided junior developers, conducted code reviews, and enforced best coding practices.
 - **Continuous Improvement:** Researched and implemented new tools, frameworks, and performance optimizations.
-

TECHNICAL SKILLS

Frontend Development:

- HTML5, CSS3, JavaScript, TypeScript, React.js, Redux, ReduxToolkit, jQuery, Ant Design, Tailwind CSS, Bootstrap, React Query / RTK Query

Backend & APIs:

- NestJS, REST API Integration, PostgreSQL, JSON Data Handling, CRUD Operations

Tools & Workflow:

- Git, Webpack, CI/CD, Performance Profiling
-

HOBBIES & INTERESTS

- Continuous Learning & Exploring New Technologies
- Creating Seamless User Experiences & Understanding User Behavior
